

Message:

Dear Colleague

The Editorial Advisory Board of the journal Cytopathology is carrying out an international survey of medical training in cytopathology. We would be very grateful if you would either complete the survey yourself or send it to a colleague who is involved in medical training in your country. If you prefer, you can consult with colleagues before completing the survey or more than one person may wish to respond. There is no restriction on the number of respondents. We are aiming to get a view of the situation in as many countries as possible and accept that there may be different points of view about some of the questions. If you would like us to send this communication to one of your colleagues (in your own country or elsewhere) please let us know at one of the email addresses below.

Your responses will be analysed by the Editorial Advisory Board with a view to publication in Cytopathology. The results of the survey would be circulated more widely if the results of the survey were to warrant the attention of those responsible for pathology training in any of the countries concerned.

It will take about 6-7 minutes to answer the survey, which is open for three months in the first instance. We would prefer to complete the survey within that time to allow time for analysis.

Please click the link below to access the survey.

Please contact one of the email addresses below if you have any problems with accessing the site.

Thank you for your time and cooperation.

Dr Amanda Herbert
Editor, Cytopathology
